

# Welcome to the Arrow Demo

## Program

---

PALO ALTO NETWORKS PA-440 30-DAY EVALUATION

---

**Thank you for your interest in Palo Alto Networks, one of the leaders in cybersecurity world wide.**

### 1. What you get in the package

- a. Checklist of the contents:
  - i) 1 x PA-440 appliance
  - ii) 1 x Power AC Adapter
  - iii) 1 x US Power Cord
  - iv) 1 x Micro-USB Cable
  - v) 1 x Ethernet Cable.
- b. Please retain the shipping box and all packing materials as you will need them to return the product back to Arrow.

### 2. Administration

- a. Demo ID / Password is admin/Arrow0ne
- b. You will need to Configure the Management Interface IP using a SSH or Telnet client; Palo Alto Networks preference is PuTTY. You can download it from their site: [www.puttygen.com](http://www.puttygen.com)
- c. After you login, following CLI instructions to set up the management port to your environment:
  - a. *Configure*
  - b. *Set deviceconfig system ip-address xxx.xxx.xxx.xxx netmask xxx.xxx.xxx.xxx default-gateway xxx.xxx.xxx.xxx dns-setting servers primary 1.1.1.1*
  - c. *Commit*
- d. Supporting instructions:

### **3. Evaluation Criterias**

- a. This Evaluation is optimized for Palo Alto Networks' Security Lifecycle Review (SLR).
- b. The SLR exercise is to provide a deeper visibility into applications used, network vulnerabilities, IoT devices and exposure to threats and risks.
- c. If you have any questions, please reach out to your Channel Manager, Technical Architect at Arrow or the Palo Alto Networks pre-sales team: [ecs.us.panwse@arrow.com](mailto:ecs.us.panwse@arrow.com)
